More about Hallucinations. Hallucinations don't belong wholly to the insane. Much more commonly, they are linked to sensory deprivation, intoxication, illness or injury. People with migraines may see shimmering arcs of light or tiny, Lilliputian figures of animals and people. People with failing eyesight, paradoxically,...

Hallucinations, by Oliver Sacks. There are Rothkoesque hallucinations with bright, glowing clouds of color; Magritte-like hallucinations featuring surreal confluences of people's heads and objects; and Picasso-esque hallucinations in which faces are grossly distorted or composed of fragments -- a nose, part of a mouth, an eye, a huge head of hair,...

Community Reviews. Incisive and compassionate, as is usual with Sacks. He explains that hallucinations are underreported because most people (and many doctors) believe that any type of hallucination means you're crazy. Did you ever hear someone speak your name or say a phrase when there is no one there to speak it.

Oliver Sacks: A Neurologist Examines 'The Mind's Eye'. Musical hallucinations may arise from a stroke, a tumor, an aneurysm, an infectious disease, a neurodegenerative process, or toxic or metabolic disturbances. Hallucinations in such situations usually disappear as soon as the provocative cause is treated or subsides.

[hallucinations book wikipedia](#)

Hallucinations (book) Hallucinations is a 2012 book written by the neurologist Oliver Sacks. In Hallucinations, Sacks recounts stories of hallucinations and other mind-altering episodes of both his patients and himself and uses them in an attempt to elucidate certain features and structures of the brain including his own migraine headaches.
